

Fife ASPC 2021-23 Improvement Plan on a page

For the full plan [Click here](#)

Our **shared vision** is to ensure that all adults at risk feel safe, supported and protected from harm

Our Improvement plan is guided by the following key **principles**:

Risks to the adult are recognised, and responded to at the earliest stage

Adults will be empowered to make choices about keeping safe from harm

Adults at risk, their carers and family (where appropriate) will be listened to, understood, respected and will have the opportunity to express their views

Adults at risk will be safer as a result of our activity, which will be based on the least restrictive intervention

Adults will have access to integrated and personalised services to keep safe from harm

ASPC have identified the following **five priority areas**

1 Stakeholder Engagement

2 Outcome focussed improvements

3 Improving Procedures

4 Workforce Development

5 COVID-19 Recovery

Our **aims**: what we want to achieve

1. Supportive & engaged communities and partnerships where adult protection concerns are recognised and responded to appropriately and without delay

2. Comprehensive and systematic approaches to evaluating process and practice and making outcome focussed improvements.

3. Effective leaders, procedures and tools to guide practice

4. All staff across partner agencies feel supported and are confident in identifying and responding to harm and providing an integrated response to reduce harm

5. Minimise the impact of COVID-19 on working practices and risk of harm

What **success** will look like

Risks are recognised and responded to without delay

Adults feel safer as a result of our intervention

Adults at risk and their families are empowered to make decisions about keeping safe

Interagency staff feel knowledgeable, confident and supported
