

WHO WE ARE

Community Trade Hub is a social enterprise working within the Levenmouth area and supporting other surrounding areas within Fife.

We are a training centre for the building and construction industry.

Our aim is to give everyone an opportunity to use a space to develop practical and life skills within the community.

We believe in training everyone in the basics of construction and life skills, so they have the foundations to pursue a successful career path.

OUR COURSES

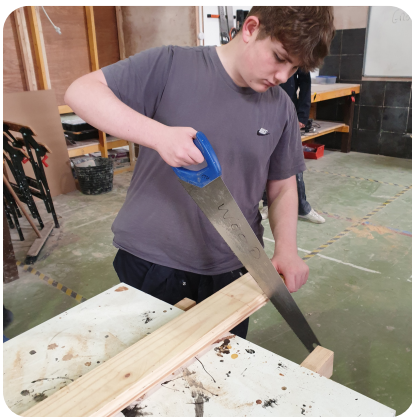

INTRODUCTION TO CONSTRUCTION

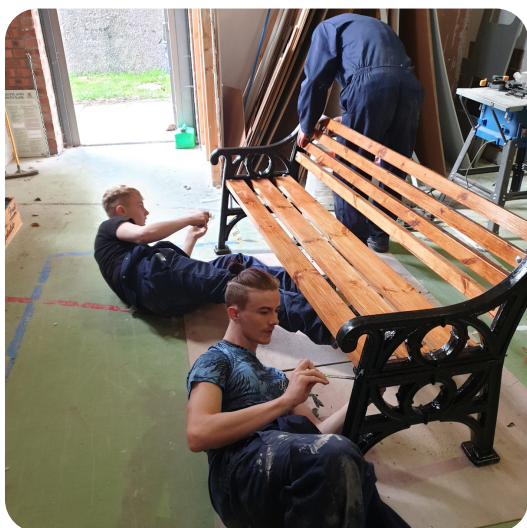

The aim of Introduction to Construction is to provide an early intervention training programme which allows individuals to try all trade disciplines to help identify which one suits them.

Using our purpose-built trade stations, they will learn the practical skills of each trade. This also includes the safe use and handling of tools and power tools, Health and Safety and PPE.

Life skills are also gained throughout with various teambuilding activities focusing on confidence, self-esteem, social interaction, strengths and weaknesses. Client's are closely evaluated to help our staff identify how we can best support each individuals needs on the career path journey.

Once the individual has Identified which trade suits them, we work with them on their specific chosen trade to help develop skills, knowledge, qualifications and confidence to give them the best opportunity to move forward in seeking employment.

We have many options available to support this, work placements with our partnership construction companies, work experience on our community projects, additional training and qualifications, local college for further education.
