

Home First

There's no place like home

As Head of Community Care Services, I am excited to tell you that in Fife our health and social care teams have been working together to look at discharge processes to prevent people being delayed unnecessarily in hospital. New approaches are being discussed that will result in a more timely and safe discharge from hospital to community settings.

Our vision is:

'Everyone in Fife is able to live longer healthier lives at home, or in a homely setting'

And we are working on a strategy that will define different pathways and improvement work being undertaken to help us realise that vision.

We need you to tell us what's important to you to help us make sure we get it right with, and for the people of Fife.

I'm inviting you to join a discussion workshop where we will update you:

- On what's been happening
- Where we are now
- Share the 'Vision' with you and invite you to tell us your thoughts?
- Ask you what your thoughts might be on some of the challenges?
- Ask you what you think we have missed?

Lynne Garvey

Head of Community Care Services
