What is personal data/information?

Personal data is defined under data protection laws in the UK and Europe as 'any information relating to an identifiable person who can be directly or indirectly identified' and is, in effect, any information about you that enables you to be identified. This would include obvious information such as your name and contact details, but could include less obvious information such as identification numbers, electronic location data, and other online identifiers. The personal data that we collect, process and store is set out in this Notice.

Data protection principles

We will comply with the data protection principles when gathering and using personal information, as set out in our Data Protection Policy.

About the information we collect and hold

The table set out in Schedule 1 below summarises the information we collect and hold, how and why we do so, how we use it and with whom it may be shared.

We may also need to share some of the categories of personal information set out below with other parties, such as our professional advisers, our regulators and funders, or otherwise as may be necessary or required to comply with the law.

We seek to ensure that our information collection and processing is always proportionate - that is, we only collect and process what we need to, and we only store it for as long as we need to. We will notify you of any changes to information we collect or to the purposes for which we collect and process it.

Where information may be held

Information may be held at our offices and by third-party agencies, service providers, representatives and agents. We have security measures in place to seek to ensure that there is appropriate security for information we hold.
